

— RELIEFNET • AN ENVIROMENTAL LIFE SAVER —

WHY RELIEFNET?

Effective

Reliefnet utilizes innovative control released technology to ensure that there is just the right amount of insecticide available on the surface when needed. Therefore, the net works with maximum efficacy throughout its lifetime.

Lightweight

Reliefnet is lightweight, which provides advantages when transporting and distributing the net.

Strong

Polyethylene is a very strong material compared to other textile fibres. This ensures that the net will not tear and/or wear easily.

Durable

Reliefnet is durable and built to last for a very long time. Allowing a maximum number of people to be protected at a minimum cost.

Flexible

Reliefnet is available in a variety of net sizes, shapes and mesh sizes to meet local needs and vector sizes. Reliefnet is available in any color without additional cost. Color does not influence the efficacy. Studies indicate that dark colored nets are washed less frequently, than light colored nets.

Convenient

Polyethylene monofilament fibres are very smooth, which means that dust does not settle easily on the net. Therefore, less washing is needed.

— RELIEFNET REVERTE – THE ENVIRONMENTALLY SOUND CHOICE —

Reliefnet Reverte offers an optional feature that makes the net the number 1 choice for environmental safety. Reliefnet Reverte features an oxo-biodegradable technology which ensures that the product will not turn into plastic waste at the end of its useful life. If Reliefnet Reverte is wrongfully disposed of in the open environment, the product will be broken down by the sun and subsequently by the microorganisms in the nature. Reliefnet Reverte will disappear by itself if left in the environment. The oxo-biodegradable technology of Reliefnet Reverte is designed in such a way that it does not influence the lifetime of the net while in use.

— AVAILABLE IN ALL COLORS —

Reliefnet LLINs can be made in any desired color. Color has no influence on the efficacy of the LLIN.

Standard colors:

-  Light blue
-  Dark blue
-  Light green
-  Dark green
-  White

Examples colors and stripes:

-  Dark green/Yellow/Red
-  Black/Red/Dark green
-  Light blue/Red
-  Dark blue/Dark green
-  Pink/Purple

— ADVANTAGES OF RELIEFNET LLINS — CUSTOMIZED LOGO NETS

- **Allow for Donor Recognition** - The presence of a logo allows donors to be clearly identified.
- **Help Attract New Donors** - Customized logo nets allow NGO's to brand themselves and draw in new donors.
- **Increase User Compliance** - Customized logo nets can further increase an LLIN's attractive appearance, further increasing the desire for user ownership and user compliance.
- **Provide Traceability** - Reliefnet LLINs with customized imprints can be used to easily trace distributed LLINs in surveillance and monitoring studies.
- **Messages** - Customized messages supporting for example malaria education campaigns can be imprinted.
